4 - Swing pricing

Subscriptions and redemptions can potentially have a dilutive effect on the Sub-Funds' Net Assets Values per share and be detrimental to long term investors as a result of the costs, bid-offer spreads or other losses that are incurred by the SICAV in relation to the trades undertaken by the Management Company. In order to protect the interest of existing shareholders, the Management Company may decide to introduce a Swing Pricing mechanism for any Sub-Fund.

If, for the Sub-Funds listed below, net subscriptions or net redemptions on any calculation day exceeds a certain threshold ("the Swing Threshold"), the net asset value per share will be adjusted respectively upwards or downwards by a Swing Factor. Swing Thresholds and Swing Factors are determined and reviewed on a periodic basis by the Management Company.

The Swing Factor is set by the Management Company to reflect estimated dealing and other costs, and may not exceed 2% of the net asset value. The volatility of the Sub-Funds' net asset values may not reflect the true portfolio performance, and therefore might deviate from the Sub-Funds' benchmark as a consequence of the application of the Swing Pricing mechanism. Performance fees, if any, are calculated on the basis of the net asset value before the application of Swing Pricing adjustments.

The Board resolved on October 21, 2015 to set up the swing pricing mechanism to certain sub-funds of the SICAV, and designated the sub-funds concerned by this decision at the Board meeting held on April 8, 2016. As a consequence, the swing pricing mechanism applies to the following Sub-funds:
