

DNCA INVEST

ALPHA BONDS

Focus on multi-strategy, flexible and international bond management.

- Flexible and international management, active management of sensitivity between [-3; +7].
- A dynamic allocation using a wide range of ESG bond strategies.
- A sub-fund that aims to outperform the €STR + 1.40% with annual volatility of less than 5%.

INVESTMENT OBJECTIVE

The Sub-Fund seeks to provide, throughout the recommended investment period of more than three years, a higher performance, net of any fees, than the €STR index plus 1.40%. This performance objective is sought by associating it to a lower annual volatility than 5% in normal market conditions.

INVESTMENT PHILOSOPHY

Flexible and international management

According to the analysis of the management team, the "absolute return" bond sub-funds allow to benefit from a wide range of bond strategies whose objective is to generate an attractive risk/return ratio in the various financial market configurations. Based on their fundamental analysis of the macroeconomic situation and its four main pillars: growth, inflation, monetary and fiscal policies, the management team selects securities from the different market segments according to their expected risk/return ratio compared to 3-year rates using a proprietary model, the RATP(1) ratio.

The allocation aims to maintain annual volatility below 5%.

Access to a wide range of bond strategies

In order to seize market opportunities, the management teams use several strategies:

- long/short directional strategy to optimise portfolio performance based on interest rate and inflation expectations,
- a yield curve strategy to take advantage of changes in the spreads between long-term and short-term rates,
- Arbitrage strategy to seek relative value within various bond asset classes,
- a credit strategy based on the use of corporate bonds.

Sensitivity is controlled between [-3; +7] to capture market performance and reduce the portfolio's exposure to rising interest rates as much as possible.

(1) Risk Adjusted Term Premium (RATP) = Excess return over the 3-year swap rate / Historical volatility (180 days).

MANAGEMENT TEAM

Pascal
Gilbert

François
Collet

Fabien
Georges

Paul
Lentz

Thibault
Chrapaty

The sub-fund is managed by Pascal Gilbert, François Collet and Fabien Georges, all of whom have extensive bond market expertise. They have over 35 years, 20 years and 15 years of experience respectively in international bonds and multi-strategy management.

In addition, Pascal Gilbert and François Collet have been working together since 2006, and were joined by Fabien Georges in 2011. They also jointly manage the DNCA Invest Flex Inflation sub-fund, and are supported on a daily basis by Paul Lentz, Fixed Income analyst.

The management team can change over time.
