

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DNCA Invest - Miuri - Class I - EUR

A sub-fund of the SICAV DNCA Invest - ISIN: LU0641746143

This fund is managed by DNCA Finance

Objectives and Investment Policy

Essential management characteristics:

The Product seeks to achieve a higher annual performance than the risk-free rate represented by the €STR rate, throughout the recommended investment period. For that purpose, the Management Company will try to maintain an average annual volatility between 5% and 10% in normal market conditions. Investor's attention is drawn by the fact that the management style is discretionary and integrates environmental, social/societal and governance (ESG) criteria.

The investment process take into account internal scoring based on an extra-financial analysis through a proprietary rating model (ABA, Above & Beyond Analysis) developed internally by DNCA. The risk exists that the models used to make these investment decisions do not perform the tasks they were designed to. The use of the proprietary tool relies on the experience, relationships and expertise of DNCA with the "best in universe" method. There may be a sector bias. The Product will proceed to the extra-financial analysis on at least 90% of its securities. Additional information on SRI strategy may be obtained in the prospectus of the Product. The Product's strategy qualifies as absolute return equity and such strategy relies on fundamental financial analysis. It invests in equities issued by European issuers (EEA plus Switzerland). The gross equity exposure associated with investments of the Product (Longs and Shorts) cannot exceed 200% of the net assets of the Product. With a net exposure limited to +/- 30% of the assets under management, it is not significantly dependent on the equity market trends and the performance depends essentially on the Management Company's capacity in identifying equities that have the characteristics to outperform their market indexes or their sector indexes.

The Product may at any time invest its net assets in:

- Equities issued in Europe (EEA plus Switzerland and UK) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 0 to 100%;
- Equities issued out of EEA plus Switzerland and UK: up to 5%;
- Equities with total market capitalisation below 150 million Euros: up to 5%;
- Euro zone Ordinary Bonds, convertible bonds or equivalent, money market instruments or deposits: from 0% to 100%;
- Up to 10% in other financial instruments.

The Product may invest up to 10% of its net assets in units and/or shares of UCITS and or AIFs. The exchange risk will not exceed 10% of the net assets of the Product. For the purpose of hedging or increasing equity or currency risk without seeking overexposure, the Product also operates on regulated markets of futures on European indexes (including or not in a DPS), as well as in UCITS, including UCITS qualifying as ETFs. The Product also operates on the foreign exchange markets to cover investments realised outside the euro area or relating to the United Kingdom, Switzerland or Scandinavia.

The Product is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

Other important information:

Income is accumulated.

The redemption of units/shares may be requested each day.

Recommended investment period:

This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

Counterparty risk: the use of OTC derivatives may expose the investor to the risk of default by the counterparty.

Risk of using derivative products: the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

The occurrence of one of these risks may lead to a reduction in the net asset value.

Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.

One-off charges taken before or after you invest	
Entry charge	2.00%
Exit charge	0.00%

The percentage indicated is the maximum that may be taken out of your capital before it is invested. In certain cases the investor pays less. You can obtain the actual amount of entry and exit charges from your financial advisor or the establishment with which you place your order.

Charges taken from the fund over a year	
Ongoing charges	1.09%

The ongoing charges are based on figures for the preceding financial year ended 31 December 2023. This percentage may vary from one financial year to another. They do not include: performance fees and transaction charges except in the case of subscription and/or redemption charges paid by the UCITS when it buys or sells units in another investment vehicle.

Charges taken from the Fund under certain specific conditions	
Performance fee	0.81% 20.00% of the positive performance net of any fees above €STR.

For further information on the charges, please see page 68 of the latest version of the prospectus available on the website www.dnca-investments.com.

Past Performance

All charges are included in the performance calculations. The unit/share described in this document was launched in December 2011.

The currency in which the performances are indicated is as follows: EUR.

Past performance is not an indication of future results.

The performance of the other share classes is available on the Management Company's website.
